Fuel Management Software

Overview

GridLink is the fuel management software connecting organizations that purchase fuel with a verified network of qualified fuel suppliers across the $6.4 trillion global oil industry. Our software enables businesses, farmers, hospitals, transportation providers, government agencies, airports, construction companies, and other fuel buyers to discover qualified fuel suppliers, compare bids, manage contracts, and streamline the procurement process. Since 2025, GridLink has secured $2.3 million in signed fuel contracts and processed more than 1 million gallons of fuel.

GridLink is raising $1 million in pre-seed funding to support approximately 18 months of product development, key hires, enterprise customer acquisition, and supplier onboarding.

Team

Julian Cavin | Cofounder & CEO

Founder of Low Fuel with seven years of fuel industry experience. Built relationships with more than 400 fuel suppliers, delivered over one million gallons, and grew Low Fuel into Minnesota's 57th-largest minority-owned company only one year out of college.

Xavier Thurman | Cofounder & CTO

Software engineer and founder of Xtrodinary Development with over seven years of IT experience. Personally delivered IT solutions for clients including CHS and IBM. Leads GridLink's software development, translating real fuel procurement workflows into scalable enterprise technology.

Founder Relationship

Cavin and Thurman were NCAA Division I football teammates at the University of St. Thomas, both playing wide receiver with their lockers right next to each other as locker buddies. Their longstanding relationship brings an established foundation of trust, teamwork, and competitive discipline to GridLink.

Product

GridLink centralizes fuel procurement in one platform. Buyers access a verified supplier network, launch sourcing events or source fuel directly, use AI to compare price, qualifications, availability, and value, award business, and monitor contracts and fuel activity in real time. A live MVP is available for demonstration and product testing.

Revenue Model

Buyer Subscription	Transaction Revenue	Supplier Network
$15K to $250K+ annually Based on company revenue and fuel spend	$0.03 to $0.05 per gallon Platform fee on fuel awarded through GridLink	Free during network expansion Designed to accelerate coverage

Market

$6.41T
Global oil industry

$900B
Annual U.S. fuel market

$2.1B
Estimated GridLink revenue opportunity

Initial go to market: enterprise and public sector organizations with significant recurring fuel spend, including aviation, transportation and fleets, government, healthcare, construction, and other large fuel consumers.

Competition

Company / Category	Fuel-specific procurement	Verified supplier network	AI bid comparison	GridLink distinction
GridLink	Yes	Yes	Yes	Buyer-to-supplier procurement system of record with sourcing, awards and contract visibility
Fuel Me	Yes	1,200+ vendors (company-reported)	Procurement technology	Direct fuel-management competitor; GridLink emphasizes transparent supplier relationships and verified sourcing workflows

Financing and Milestones

Round	Timing	Runway	Amount	Status	Milestones
Pre Seed	Planned	~18 months	$1M	Planned	Advance product and AI workflows; hire initial team; onboard 1,000+ qualified suppliers; secure enterprise pilots; build case studies; expand compliance coverage
Seed	Future	TBD	TBD	Future	Scale repeatable enterprise sales, national supplier coverage, platform infrastructure, and additional procurement modules

Pre Seed Use of Funds

40%
Product, AI workflows, security & infrastructure

30%
Enterprise pilots, customer acquisition & case studies

20%
Supplier onboarding & compliance coverage

10%
Legal, insurance, cloud systems & financial controls

A portion of the $1 million pre seed investment will support hiring key team members across software development, sales, supplier onboarding, and business operations to accelerate GridLink's growth.

Comparables

Comparable	Event	Amount / Price	Date	Traction / Outcome	Why it matters
Fuel Me	Series A	$18M	Mar. 2024	Private fuel procurement and management platform	Direct proof of venture investment in fuel procurement technology
Procore	IPO	$67/share; $665.1M net proceeds	May 2021	11,149 customers by Q2 2021	Vertical management software example showing how an industry workflow platform can scale
